Responsible for serving food and/or dishwashing.

Self Evaluation

Skills required for all of my past jobs were mostly flexibility as work times were highly flexible and every day was a new surprise as to what it was giving that day. And problem solving because for most of these jobs I had to work individually or in a small team, we/I had to come up with a quick solution to problems that may occur; and report back or ask for help to the home front.

Other skills I picked up over my last few jobs were among other things planning ahead, being friendly at all times, both teamwork and working individually, and working with fixed deadlines.
